

Deep River On-Site Care evolved from a request by a local employer to resolve shortcomings of companies managing on-site health care from distant locations. The program has developed into a multi-phased partnership integrating employers and providers in a spirit of cooperation and transparency through a shared commitment to optimizing employee health.

The On-Site Care Concept Provides:

- Increased productivity from healthy employees
- Decreased absences due to off-site doctor visits and untreated conditions
- Streamlined communication for disease management through a new point of contact
- Option of health risk assessments (*HRAs*) with health surveys and screenings to identify at risk employees who may not otherwise seek care
- Incentive for recruitment and retention of employees
- Potential for the reduction in overall health care costs

Cornerstone Health Care's Deep River On-Site Care Features:

- Triad-based multi-specialty physician group with primary care providers and specialists accepting referrals and new patients from sixty locations
- Sophisticated electronic health record system with extensive database to facilitate integration between employers and physicians, and on-site providers and patients' primary care providers
- Accessible, accountable and experienced physicians supervising the activities of on-site mid-level providers
- Capability to develop on-site disease management programs based upon effective models such as the Asheville Project
- Opportunity to create customized wellness/health strategies to prevent the onset of chronic conditions such as heart disease and diabetes

Services Available:

- "Sick visits" for cold, flu, urinary tract infections, etc.
- Treatment of minor injuries
- Office surgery (*mole & cyst removal, laceration repair, skin biopsies, etc.*)
- Women's health including Pap smears
- Screenings for cancer, cholesterol, blood pressure, blood sugar, etc.
- Continuity of care for diabetes, hypertension, coronary disease, respiratory problems, allergies, arthritis, orthopaedic injuries, etc.
- Preventive health exams
- Pulmonary function testing
- Audiometric screening
- EKGs
- DOT physicals
- Vision screening
- Workers' comp injury treatment
- Other health services upon request

Cornerstone Health Care's

Deep River

ON-SITE CARE

offers area businesses high quality, convenient and immediate medical care provided within their own facility.

Employees are diagnosed, treated and returned to work without leaving the building, and have prompt access to preventive care and wellness counseling.
